

INCREASE YOUR PRODUCTIVITY TODAY

Developers And Programmers

START

Use a code editor

A code editor helps a programmer writing, reading and editing codes effectively.

Therefore, depending on your need, using a code editor can help write error-free codes swiftly and effectively.

Start with the most difficult task everyday

Managing your own deadlines and Tasks can be challenging at times.

It is easy to give in to procrastination. In such cases it is important to set a hierarchy of tasks and start with the most difficult one each day.

Take breaks regularly

You Can only stay focussed on a particular task for a set amount of time and it is natural for the mind to wander away.

Therefore, taking short breaks every 15-20 minutes can help you refresh your mind and come back to the task with a better focus.

A large, thick orange arrow pointing upwards and to the right, with a dark teal outline. The arrow starts from the bottom left and curves upwards towards the top right. The number '03' is written in black on the arrow's tip. A soft shadow is cast below the arrow.

03

Schedule tasks in advance

Scheduling tasks in advance can help you manage deadlines, increase productivity and manage your workflow better.

There are apps like Wunderlist and Todoist that help you create workflows and integrate with other productivity tools.

04

Track your own working hours

There are time tracking tools that help you do that. These tools show you spent time during the day and what tasks took up most time.

This can help you screen out possible distractions.

Use Automation

Automating repetitive tasks can help you get the job done faster and more efficiently.

There are a number of routine tasks like image optimization, prefixing, minification etc. that can be automated to save a lot of time.

Use the command line

Using CLI or Command Line Interface can speed up your workflow.

Also, CLI is an important programming skill that can be helpful in other areas of work too.

Eliminate Distractions

Distractions like checking your emails every hour, responding to social media comments, checking notifications can seem harmless but can eat up a lot of your time and kill productivity.

Therefore, it is important to self-exercise precautions to keep them at bay.
